Prijepolje

## Prijepolje

Prijepolje se oduvek vezivalo za manastir Mileševu koji je manje od 6 kilometara udaljen od grada, ali posetioci i danas iznenadi podatak da je odatle i jedna freska otišla u Svemir. Čuveni Beli anđeo, ukras srpskog srednjovekovnog fresko slikarstva koji je nastao u XIII veku, bio je jedna od slika koje je čovek poslao kao poruku prijateljstva i dostignuća prvo preko okeana, a onda i u kosmos i to pored fotografija Kineskog zida i sletanja na Mesec. U centru treba posetiti džamiju i crkvu, videti Sahat-kulu i prošetati pored Lima, a potom obići okolinu, gde se nalaze neke od najzanimljivijih lokaliteta. Glavna atrakcija kada je u pitanju priroda, jesu slapovi Šopotnice. Jedno od omiljenih sela među turistima svakako je Kamena Gora.

Prijepolje has always been associated with the Mileševa Monastery, located less than 6 kilometers from the town. However, visitors are often surprised to learn that a fresco from here once traveled into the Space. The famous White Angel, a masterpiece of Serbian medieval fresco painting created in the XIII century, was one of the images that humanity sent as a message of friendship and achievement—first across the Ocean, and then into Space. It was included alongside images of the Great Wall of China and the Moon landing. In the town center, you'll likely visit the mosque and church, see the Clock Tower, and stroll along the Lim River before exploring the surrounding area, where some of the most fascinating attractions are tucked away. A major natural highlight is the Šopotnica Waterfalls, and one of the favorite villages among tourists is Kamena Gora.
